

ABOUT ME

An attentive and passionate Java/Kotlin back-end Software Engineer with 3+ years of professional work experience. I'm mainly focused on developing cloud serverless, highly scalable, containerized back-end applications with Spring, Micronaut, Quarkus and VertX technologies.

Moreover, I have developing experience in cloud with AWS and databases with DynamoDB, MariaDB and MySQL.

During my professional experience, I have contributed to development of websites, Android applications, which are used by millions and in multi-national distributed projects.

I'm passionate about learning new technologies, helping and sharing my knowledge with my team. Furthermore, I'm developing open-source projects in my free times.

WORK EXPERIENCES

iConec Wave (Istanbul/Fully Remote)

Feb 2022 – Present | Java Software Engineer
(Java/Kotlin/Spring/AWS)

Kod Gemisi (Turkey/Fully Remote)

Oct 2021 – Jan 2022 | Intern
(Kotlin/MicronAut/Hexagonal Architecture)

Statu (Turkey/Fully Remote)

Jan 2020 – Sep 2021 | Back End Developer
(Kotlin/Vert.X/Docker/ClickHouse)

General Mobile Inc. (Istanbul/In Office)

Nov 2017 – Aug 2018 | Junior Android Developer
(Kotlin/Java/Android/MVVM/MVC/MVP)

PROJECTS

iConec Wave - Royal Canin

AWS, Spring, Java, Serverless, PostgreSQL, DynamoDB, S3
Royal Canin is a famous French cat & dog food producer. I'm contributing in development of web services solutions for distribution, veterinary clinic and customer order managements in US, France and Japan countries.

iConec Wave - DxPathFinder

AWS, Java, Serverless, DynamoDB

DxPathFinder is an online digital performance cockpit. I provide web service solutions for project needs also with helping improving business calculations.

Kod Gemisi - Grispi >> <https://grispi.com>

Kotlin, Java, Micronaut, Hibernate, Docker, PostgreSQL, Hexagonal Architecture

Grispi is a CRM application like Zendesk. I improved and added new scenario tests, optimized code base, and developed web services for groups and tickets in application.

General Mobile - Android Applications

Kotlin, Java, Dagger, Retrofit, Picasso, MVVM, MVP, MVC

I developed Android applications which are still available and are used by millions in Google Play. The applications I contributed to development of new futures and bug fixes were GM Gallery GO, GM Music, GM File Manager, GM Voice Recorder and GM Assistant.

Portfolio >> <https://duruer.dev>

Since 2020 | SvelteKit, Netlify, Bootstrap 4

My small open-source serverless portfolio website. It was built with SvelteKit, Netlify, Bootstrap 4 and SvelteKit, and supports both Turkish and English languages.

Routve

2020 | Svelte

An open-source advanced Svelte 3 router library which is based on Page.js library, and supports dynamic and static component import.

Pano

2018 - 2022 | SvelteKit, SASS, Kotlin, MariaDB, Vert.x

An open-source advanced gaming CMS for Minecraft community server website needs. It supports themes, addons and more features. I built with Kotlin, SvelteKit and previously Vue.
